

1. Scope and inputs

Sample data	Fictitious organization. Results are a demonstration, not a compliance status.
Report	rpt-a73854efc07b4c97 (profile_b)
Scope	tenant demo, workspace sample
Snapshot	rev-1
Evaluation	eval-ccd341c5fe3f228c
As of	2026-10-09 08:35:11 UTC
Generated	2026-10-09 08:35:11 UTC by user:usr-cec7e2d4e5c771f3 (user)
Engine	compliance-engine dev, canonical schema 0.1.0
Catalog	aiact@1.0.0: EU AI Act (EU, effective 2024-08-01); source: Regulation (EU) 2024/1689 (AI Act) (indicative, pending legal review; Milestone 8 scope)
Catalog	dora@1.0.0: DORA (EU, effective 2025-01-17); source: Regulation (EU) 2022/2554 (DORA) and the ITS on the register of information (indicative, pending legal review)
Catalog	gdpr@1.0.0: GDPR (EU, effective 2018-05-25); source: Regulation (EU) 2016/679 (GDPR) (indicative, pending legal review; Milestone 8 scope)

2. Score and coverage

Overall: score 100% (8/8), coverage 47%, 17 in scope, 9 not assessed
EU AI Act (aiact@1.0.0): score not defined, coverage 0%, 3 in scope, 3 not assessed
DORA (dora@1.0.0): score 100% (8/8), coverage 72%, 11 in scope, 3 not assessed
GDPR (gdpr@1.0.0): score not defined, coverage 0%, 3 in scope, 3 not assessed

The score counts controls ready (and, where the catalog says so, monitoring) among assessable controls. Coverage is the share of in-scope controls that could be assessed. The two are always stated together.

3. Controls

EU AI Act (aiact@1.0.0)

Control	Status	Attention	Stage	Owner	Approved until	Due
ai-inventory	not_assessed	-	none	-	-	-
ai-provider	not_assessed	-	none	-	-	-
ai-oversight	not_assessed	-	none	-	-	-

4. Control details

ai-inventory: AI system inventory

Workloads, including AI and model-related resources, are identifiable in the inventory.

Status	not_assessed; computed not_assessed; stage none
Source	AI Act Art. 26 and 49 (indicative)
Rule	records_exist on cloud_resource; inputs cloud_resource.resource_ref
Records examined	0
Blocker	no_records cloud_resource
Evidence	required for approval; expected: Inventory of cloud resources
Linked evidence	none

ai-provider: Provider and hosting visibility

Providers and hosting regions are visible for governance review.

Status	not_assessed; computed not_assessed; stage none
Source	AI Act Art. 25 and 26 (indicative)
Rule	fields_complete on cloud_resource; inputs cloud_resource.provider_key, cloud_resource.region
Records examined	0
Blocker	no_records cloud_resource
Evidence	required for approval; expected: Cloud resources with provider and region
Linked evidence	none

ai-oversight: Human oversight review

A human oversight review point exists for model routing and operational decisions. This cannot be assessed from inventory data.

Status	not_assessed; computed not_assessed; stage none
Source	AI Act Art. 14 and 26 (indicative)
Rule	manual
Records examined	0
Blocker	requires_human_assessment
Evidence	required for approval; expected: Oversight procedure and review records
Linked evidence	none

dora-roi-reporting-entity: Reporting entity is identified

The entity maintaining the register is identified with LEI, name, country, type, competent authority and reporting date.

Status	monitoring; computed monitoring; stage none
Source	ITS Rol template B_01.01 (indicative)
Rule	fields_complete on reporting_entity; inputs reporting_entity.lei, reporting_entity.name, reporting_entity.country, reporting_entity.entity_type, reporting_entity.competent_authority, reporting_entity.reporting_date
Records examined	1
Evidence	required for approval; expected: Reporting entity record with every register field
Linked evidence	none

dora-roi-provider-identification: ICT third-party providers are identified

Every ICT third-party service provider has an identification code and type, legal name, person type and headquarters country.

Status	ready; computed monitoring; stage approved
Approval	approver@demo.invalid on 2026-10-09, until 2027-10-09, evaluation eval-be9b3efda231e668
Source	DORA Art. 28(3); ITS Rol template B_05.01 (indicative)
Rule	fields_complete on ict_provider; inputs ict_provider.provider_id_code, ict_provider.provider_id_type, ict_provider.legal_name, ict_provider.person_type, ict_provider.hq_country
Records examined	11
Evidence	required for approval; expected: Provider master data for every ICT third-party service provider
Linked evidence	evd-a4b2e4d6636d4707: Provider audit summary (document, SharePoint); file;

sha256:74f3b1a826331e74e3dc6f9ed92dc74895eb4a825cc01206143ac0f9bcced11c; active,
verified by engine_file; collected 2026-10-09, valid until -

dora-roi-ultimate-parent: Ultimate parent of each provider is known

Each provider records its ultimate parent undertaking (or declares it not applicable), and the parent is itself a registered provider.

Status	monitoring; computed monitoring; stage none
Source	DORA Art. 29; ITS Rol template B_05.01 (indicative)
Rule	references_resolved on ict_provider, fields parent_id_code; inputs ict_provider.parent_id_code
Records examined	11
Evidence	required for approval; expected: Ultimate parent identification per provider
Linked evidence	none

dora-roi-data-location: Data location of ICT services is known

Country of provision, storage and processing are recorded and confirmed for every ICT service line.

Status	not_assessed; computed not_assessed; stage none
Source	DORA Art. 28(3); ITS Rol template B_02.02 (indicative)
Rule	fields_complete on arrangement_service_line; inputs arrangement_service_line.country_of_provision, arrangement_service_line.data_at_rest_country, arrangement_service_line.data_processing_country
Records examined	20
Blocker	missing arrangement_service_line ["CTR-2022-005","DEMO00BANK0000000179","DEMO00PROV0000000440","F02","network"] data_at_rest_country
Blocker	missing arrangement_service_line ["CTR-2022-005","DEMO00BANK0000000179","DEMO00PROV0000000440","F02","network"] data_processing_country
Blocker	missing arrangement_service_line ["CTR-2023-008","DEMO00BANK0000000179","DEMO00PROV0000000731","F03","cloud_iaas"] data_at_rest_country
Blocker	missing arrangement_service_line ["CTR-2023-008","DEMO00BANK0000000179","DEMO00PROV0000000731","F03","cloud_iaas"] data_processing_country
Blocker	missing arrangement_service_line ["CTR-2024-011","DEMO00BANK0000000179","DEMO00PROV0000000246","F07","core_banking_saas"] data_at_rest_country
Blocker	missing arrangement_service_line ["CTR-2024-011","DEMO00BANK0000000179","DEMO00PROV0000000246","F07","core_banking_saas"] data_processing_country
Evidence	required for approval; expected: Register lines with confirmed provision, storage and processing countries
Linked evidence	none

dora-roi-arrangement-dates: Arrangement dates are recorded

Start and end dates are recorded for every ICT service line.

Status	monitoring; computed monitoring; stage none
Source	ITS Rol template B_02.02 (indicative)
Rule	fields_complete on arrangement_service_line; inputs arrangement_service_line.start_date, arrangement_service_line.end_date
Records examined	20
Evidence	required for approval; expected: Contract start and end dates per service line
Linked evidence	none

dora-roi-signatories: Arrangement signatories are recorded

Signatories of contractual arrangements are recorded.

Status	monitoring; computed monitoring; stage none
Source	ITS Rol templates B_03.01 to B_03.03 (indicative)

Rule	records_exist on arrangement_party; inputs arrangement_party.party_id_code
Records examined	30
Evidence	required for approval; expected: Signatory records per contractual arrangement
Linked evidence	none

dora-supply-chain-visibility: ICT supply chains are recorded

Subcontracting chains behind ICT services are recorded with rank and recipient.

Status	monitoring; computed monitoring; stage none
Source	DORA Art. 28(3); ITS Rol template B_05.02 (indicative)
Rule	records_exist on supply_chain_link; inputs supply_chain_link.rank, supply_chain_link.recipient_id_code
Records examined	3
Evidence	required for approval; expected: Ranked subcontractor records per ICT service
Linked evidence	none

dora-function-criticality: Functions have a criticality assessment

Every function supported by ICT services has a criticality assessment, assessment date, RTO, RPO and discontinuation impact.

Status	monitoring; computed monitoring; stage none
Source	DORA Art. 28(4); ITS Rol template B_06.01 (indicative)
Rule	fields_complete on function; inputs function.criticality_assessment, function.last_assessment_date, function.rto, function.rpo, function.discontinuing_impact
Records examined	8
Evidence	required for approval; expected: Criticality assessment per function
Linked evidence	none

dora-substitutability-assessed: Substitutability of ICT services is assessed

Each assessed ICT service records substitutability, last audit date, reintegration possibility and whether alternatives are identified.

Status	monitoring; computed monitoring; stage none
Source	DORA Art. 28(4) and 29; ITS Rol template B_07.01 (indicative)
Rule	fields_complete on service_assessment; inputs service_assessment.substitutability, service_assessment.last_audit_date, service_assessment.reintegration_possibility, service_assessment.alternatives_identified
Records examined	8
Evidence	required for approval; expected: Substitutability assessment per ICT service
Linked evidence	none

dora-exit-plans: Exit plans exist for assessed ICT services

An exit plan exists for every assessed ICT service.

Status	not_assessed; computed not_assessed; stage none
Source	DORA Art. 28(8); ITS Rol template B_07.01 (indicative)
Rule	field_equals on service_assessment, field exit_plan_exists = true; inputs service_assessment.exit_plan_exists
Records examined	8
Blocker	missing service_assessment ["CTR-2022-005", "DEMO00PROV0000000440", "network"] exit_plan_exists
Blocker	missing service_assessment ["CTR-2023-007", "DEMO00PROV0000000634", "security_operations"] exit_plan_exists
Blocker	missing service_assessment ["CTR-2024-010", "DEMO00PROV0000000925", "data_analytics"] exit_plan_exists
Evidence	required for approval; expected: Exit plan document per assessed ICT service
Linked evidence	none

dora-incident-readiness: ICT incident management readiness

Incident procedures and recovery tests are documented and reviewed. This cannot be assessed from register data.

Status	not_assessed; computed not_assessed; stage none
---------------	---

Source	DORA Art. 17 to 19 (indicative)
Rule	manual
Records examined	0
Blocker	requires_human_assessment
Evidence	required for approval; expected: Incident management procedure; Latest recovery test report
Linked evidence	none

gdpr-residency: Processing location visibility

Workload regions and resolved countries are available for data-flow review.

Status	not_assessed; computed not_assessed; stage none
Source	GDPR Art. 30 and 44 (indicative)
Rule	fields_complete on cloud_resource; inputs cloud_resource.region, cloud_resource.country
Records examined	0
Blocker	no_records cloud_resource
Evidence	required for approval; expected: Cloud resources with region and country
Linked evidence	none

gdpr-transfer: Transfer risk review

Sovereignty indicators (provider and ultimate parent jurisdiction) are available for cross-border transfer review.

Status	not_assessed; computed not_assessed; stage none
Source	GDPR Chapter V (indicative)
Rule	fields_complete on cloud_resource; inputs cloud_resource.sovereignty_indicators
Records examined	0
Blocker	no_records cloud_resource
Evidence	required for approval; expected: Sovereignty indicators per cloud resource
Linked evidence	none

gdpr-governance: Governance and accountability metadata

Ownership and classification of processing are reviewed by the controller. This cannot be assessed from inventory data.

Status	not_assessed; computed not_assessed; stage none
Source	GDPR Art. 5(2) and 24 (indicative)
Rule	manual
Records examined	0
Blocker	requires_human_assessment
Evidence	required for approval; expected: Record of processing activities with owners
Linked evidence	none

5. Data completeness

Canonical schema 0.1.0, 121 records.

Entity	Records	Missing	Derived
arrangement_party	30	0	0
arrangement_service_line	20	6	0
arrangement_user_entity	15	0	0
branch	1	0	0
cloud_resource	0	0	0
contractual_arrangement	15	0	0
financial_entity	2	0	0
function	8	0	0
ict_provider	11	0	0
ict_service_type	7	0	0
intragroup_arrangement_link	0	0	0
reporting_entity	1	0	0
service_assessment	8	3	0
supply_chain_link	3	0	0

Export-required gaps: 9 with a supplying adapter, 0 not supplied by any adapter.

Readiness and evidence report

Tenant demo, workspace sample, snapshot rev-1, as of 2026-10-09 08:35:11 UTC

Field	Ref ref	Missing	Derived	Supplied
arrangement_service_line.data_at_rest_country	B_02.02.0150	3	0	yes
arrangement_service_line.data_processing_country	B_02.02.0160	3	0	yes
service_assessment.exit_plan_exists	B_07.01.0080	3	0	yes

Invalid coded values: 0.

Unverified codelists arrangement_type, competent_authority, criticality_assessment, data_sensitiveness, entity_type, group_hierarchy, ict_service_type, impact_level, licensed_activity, person_type, provider_id_type, reintegration_possibility, reliance_level, substitutability

Dangling references: 0. Reference cycles: 0.

6. Limitations

- Control catalogs and their mapping to regulatory requirements are indicative pending legal review.
- 9 of 17 controls could not be assessed from the data supplied; the score covers assessable controls only (coverage 47%).
- Evidence is referenced, not inspected: the engine records locations and checksums and does not assess the content of evidence documents.
- Coded values were not checked against official lists for: arrangement_type, competent_authority, criticality_assessment, data_sensitiveness, entity_type, group_hierarchy, ict_service_type, impact_level, licensed_activity, person_type, provider_id_type, reintegration_possibility, reliance_level, substitutability.
- aiact@1.0.0: Score is the share of assessable controls that are ready or monitoring. Coverage is the share of in-scope controls that are assessable. Missing data is never counted as a pass. Ready requires human approval.
- dora@1.0.0: Score is the share of assessable controls that are ready or monitoring. Coverage is the share of in-scope controls that are assessable. A control is not assessable (not_assessed) when a required input is missing, derived without confirmation, or references a record that does not exist, when the rule applies to no records, or when it needs a human assessment. Missing data is never counted as a pass. Ready requires human approval.
- gdpr@1.0.0: Score is the share of assessable controls that are ready or monitoring. Coverage is the share of in-scope controls that are assessable. Missing data is never counted as a pass. Ready requires human approval.
- Statuses, approvals and evidence validity are stated as of 2026-10-09T08:35:11Z and change over time.

7. Disclaimer

Not legal advice, not certification. This report states what the compliance engine evaluated from the data supplied, at the time shown. Wording pending legal review.
